## Questions and replies No. 2, 16. Jan. 2018

Doc. No. 10 - Tender information		
No.	Question	Answer/reply
10-1.	Please could you confirm if submission of a proposal document via electronic methods (email/secure file transfer) by 1400 23rd January 2018 with a hard copy to follow immediately by post will be acceptable?	No, that is not possible according to EU-legislation. A hard copy of the proposal must be available on the offer deadline, 23. Jan. 2018 at 14.00 pm.
10-2.	Would it be possible to provide a copy of the ESPD Document in English (in MS Excel Format)?	The ESPD is in pdf-format and XML-format. The XML-format can be opened and text in headings will be automatically changed to English, when you choose "English" in the upper right side of the website. However, English versions of document 16 in both pdf- and XML-format are uploaded with this document. It is only possible to use the ESPD in either pdf- og XML-format, not Excel-format.
10-3.	In reference to the tender for geotechnical investigations at the Lillebaelt Syd Nearshore Wind Farm, is it possible to have an EPSD form in English for completion pleased?	See question No. 10-2.

Doc. No. 11 - Specifications		
No.	Question	Answer/reply
11-1.	<b>Clause 2.3</b> With the borehole and vibrocore positions fixed (re. Table 2.1 and 2.2) is it possible that the Client can provide the water depth and expected thickness of mud at each position to be investigated ? The mentioned information is crucial for optimum selected of vessels and spreads.	Reporting of the detailed bathymetric study made in year 2017 has not been finalized, hence the exact water depths at the informed locations for the investigations cannot be informed. The magnitude of mud in the area shall be based on the survey report referred to in Document no. 11. The Survey report (GEUS 2016/29) is enclosed as Appendix 1. The report is in Danish.
11-2.	Please may we ask for confirmation on the approximate water depths at each of the 5 borehole locations.	See question No. 1.

Doc. No. 13 - Description BOQ		
No.	Question	Answer/reply

Doc. No. 13 - Description BOQ		
No.	Question	Answer/reply
13-1.	<p><b>Clause 2.1, 2.2 and 2.3</b></p> <p>For the work described under the mentioned clauses the variation in quantities are stated as -100% + 100 %. What does the <math>\pm 100\%</math> means for these actual mobilization and demobilization items ?</p> <ul style="list-style-type: none"> <li>• + 100 % does this mean and extra mobilization could be necessary ?</li> <li>• <math>\div 100\%</math> is not deemed relevant if a contract is signed ?</li> </ul>	<p>The variation of prices for mobilisation, demobilisation and facilities ref. to Document 13 - Description of Bill of Quantities clause 2.1, 2.2 and 2.3 shall not be considered.</p> <p>Prices for the said items shall be based on no variation of quantities.</p>
13-2.	<p><b>Clause 4.1</b></p> <p>Under this clause it is stated that the lump sum for acceptance of all risks shall include: "risks associated with the presence on site of munitions/ordnance".</p> <p>Do the Client have any investigations, information or similar in respect risk for possible munitions/ordnance on site ?</p>	<p>Investigations for munitions/ordnance has been performed in year 2017 but is not reported. The report is expected to be released before starting the site works. Locations for investigations can be shifted to avoid collision with munition/ordnance.</p>
13-3.	<p><b>Clause 4.1</b></p> <p>Under the "Price adjustment" calculation formula is mentioned item 2.01 - 2.03. This items are not included in the BoQ. What are the relevant items ?</p>	<p>Updated specification of variables for Document 13 - Description of Bill of Quantities clause 4.1:</p> <p><math>A_T</math> = Tendered lump sum for acceptance of risk ref. A3</p> <p><math>A_A</math> = Adjusted lump sum for acceptance of risk ref. A3.</p>
